

# Course Evaluation Grid

---

Course name: Social Media and Education

Search tools:	Google
Store/Archive tools:	Blogs, facebook and Youtube (to store videos)
Editing tools :	Blogs (students wrote texts),
Publish/Aggregation tools:	Blogs (posts had a combination of text, images and video)
Comunication tools:	Students didn't use any (they were in class, spoke directly to one another)

Remarks:

Our trainings are quite productive because the students are teacher candidates and they learn a new teaching method by using the social media which is very popular in our era. Thanks to this training, they not only use social media in their daily life, they make use of it which is not something most people do as we know.
