

Pedagogic Evolution with Online Personal Learning Environments – PEOPLE

We are so happy to make the
4th meeting in our country
& Afyon. Welcome again!

- Our organisation is an organisation which works on adult education as you all know. It gives services to people from all ages, though. Via Grundtvig programme, we focused on teachers who completed their education at university but couldn't find a job.

With this target group, we completed 'Personal Learning Environment Education Seminar'. We started in September and completed it in 8 weeks with a 32 hours programme.

We need to accept the fact that we (our country and the whole world.) are in an era of 'Internet and Social Communication.' The biggest proof for that is the total number of the Social Media users.

- In the world, Social Media (**Facebook, Twitter, YouTube, Google+, LinkedIn**) has more than 2,5 billion active users in a month.

We, as an organisation who gives adult education service, tried to Show to our students (who haven't had a job yet) the power and the necessity of Social Media tools which they can use it as 'Education Method' and which will contribute to their future career plans.

Considering the fact that our students are teachers as well, we helped them learn, manage and organize their own PLE. We stated the fact that their students will also be one of 2,5 billion people who are active users of Social Media when they start their teaching career

When we think about their career, we indicated that using Social Media as an Education Tool will make them be more succesful than others.

- By realising an application with our Wordpress blog we made, we all shared the things that we don't know. We helped them realize that the use of Social Media tools such as Facebook, Twitter, YouTube will make them reach their learning goals, manage their learning process and context by contacting other people during the learning process.

- Thanks to 'PEOPLE', our students will be able to meet people from Europe and also see what and how these 'People' make use of Social Media Tools. And therefore, they will learn new and better ways to use Social Media and at the same time they will share their opinions. Then, it will grow bigger and bigger and maybe it will change lives of some of us.

A rectangular box with a light beige border and a white inner border. Inside the white border is a grey rectangular area with rounded corners. The text "We're so glad to be a part of PEOPLE!" is centered within the grey area.

We're so glad to be a part of PEOPLE!
