4. STUDENTS FORMATION INITIAL SESSIONS:

- Registration in e-mail / Facebook (if needed).

5. EXTENSION TO ALL LEVELS AND GROUPS

PROS:

- Bigger amount of visiting pupils / students.
- Bigger scope of contents.
- Help students who can't attend lessons to keep the pace & updated.
- Foster autonomous work: all notes include links for practice.
- Add general Centre information for our students (events and notifications).

<u>CONS:</u>

- Notes not ordered by homogeneous level but mixed.
- Not restricted only to CEPER Miguel Hernandez but to the rest of the groups, but demand coordination inter-centres.
- Different teaching staff / Different pupils / Different Centres.

OBJECTIVES: Achieved

- 1. Creation of a corpus of materials suitable to the different levels.
- 2. Learning autonomy (students can elaborate their own English learning portfolio).
- 3. Contents: Can be printed or checked online.
- 4. Bigger spread of results.
- 5. Publicize Centre's celebrations / events.

OBJECTIVES: Pending

- 1. Achieve bigger interaction of students when consulting <u>linguistic notes</u>. (They seem to be too shy to answer doubts online and prefer to do it in class; <u>events</u> are commented).
- 2. Students consider *"I like"* button as the only way to interact with the site instead of asking questions. To achieve more and better online interactions.
- 3. Identify more efficiently the materials for each Centre / Sections (specially topic notes; Grammar notes are general).

INTERMEDIATE ASSESSMENT

- 1. 89 students follow the site (initially planned for 18 A2 students; now also for absolute beginners, A1 and Secondary Adult Education students).
- 92 people receive the communications. This number will be increased in further courses. (The number of students hasn't grown in the last month).

INTERMEDIATE EVALUATION (2)

- Many of the previous students haven't checked the option "Receive notifications" after I changed the Facebook status to Coorporation Site. These students were many of the ones who aren't able to attend classes regularly, so they don't receive automatically the update unless they check our site.
- Satisfactory results: students show having checked online notes and site by asking questions IN CLASS about what they have read.

RESULTS ASSESSMENT.

• 1. Very positive in general terms.

 2. A bit dissapointing in terms of online interaction on Grammar (not subsequent faceto-face interaction or event commentaries).

• 3. Attempt to better restructure the contents.
